

Density

100% DWARF ZOYSIAGRASS (ZOYSIA MATRELLA)

TOP SOIL	MOWING HEIGHT AT HARVEST	SIZE	TIME FROM STOLONIZATION TO HARVEST
SAND CARPET (93% silica sand - 7% zeolite + biochar)	20 mm	Mini roll (mt. 0,40 x 1,26); Big roll (mt. 1,20 x 9,00)	Over 18 months

Fairways, Sports
Fields and Lawn
Gardens with low
mowed Zoysia

Dark zoysia sod with very low mowing height (15 mm). Thanks to its rapid rate of spread and tolerance to footwear, is ideal for all sports surfaces. Made with a new generation fine-leaf cultivar, very shade-tolerant, combines an excellent aesthetic quality with limited maintenance. Can also be installed in summer by sprigs through our Techno Sod sprig propagation service

Product advantages

- ✓ Produces a very fine and elegant turf surface. Retains for a long time in winter months its dark green color and has a fast spring green-up
- ✓ Thanks to its shade tolerance, is recommended as an alternative to bermudagrass in parkland golf fairways with trees, partially shaded sports fields, and lawn gardens that have up to 30-50% daytime shade
- ✓ Very competitive with weeds. Once established, its high density and vigorous growth, do not allow weeds to establish
- ✓ Grows in a wide variety of soil and climate conditions, from sandy to heavy soils. Resists to salinity
