

Easy Blue

100% KENTUCKY BLUEGRASS

TOP SOIL	MOWING HEIGHT AT HARVEST	SIZE	TIME FROM PLANTING TO HARVEST
MODIFIED SANDY LOAM (natural sandy soil improved with silica sand)	25 mm	Mini roll (mt.0,40 x 1,26); Big roll (mt.1,20 x 9,00)	Over 12 months

Low mowed Kentucky Bluegrass Residential Lawns

It is a turfgrass sod, made of American and European Kentucky bluegrass seed varieties. The main characteristic of this fine leaf turf is its easy maintenance. Unsurpassed from an aesthetic point of view, it is suitable for all types of soils

Product advantages

- ✓ Versatile for all purposes, from small walkable gardens to big parks, withstands hot-dry summers well and requires little maintenance work
- ✓ Fine leaf turf with an elegant natural green color that disguises weeds. Excellent for lawns in full sun, adapts well to partially shaded areas
- ✓ Dense and compact has a mowing height that goes from 3.5 to 5 cm. Suitable for robotic mowing due to its horizontal, slow and constant growth habit without peaks
- ✓ Strong and robust, withstands continuous wear and tearing with an abundant development of rhizomes that rapidly close divots
